Collection

Arr! Puzzle Plunder is a lovely crafted match three game within a pirate setting.
The art is well done and the gameplay also feels smooth.

You have to match the several items (Flags, Swords, Keys, Rum, Gold and Buckets) in order to gain certain effects or accomplish things. E.g. in order to "sail" through the level, you have to match flags. In order to defeat bosses, you have to match swords and so on. You also gain loot, which you can use to upgrade your ship.
The upgrade part also feels pretty good, because you can really feel the difference it makes everytime you upgrade.

And the best part: IT'S FREE and a ton of fun.

I can definitely recommend it!. I enjoy picking up a game thats simple to play. This game is a simple match 3 game, but with some twists that make it worth playing. It never gets boring because you have limitations. The preasure builds, the adrenaline flows, and then there is the calm before the storm. To anyone looking for a FREE game, it's one you can pick up and play at any time, for a quick game, to a long game. I love the pirate theme, the music, the sound effects, the art. I have personally bought the game (DLC), because I believe in supporting developers that put the time and effort in to giving without expecting anything back. The world needs more developers like this... I anyone reading this would agree. If anyone can get over level 27, i tip my hat to you!
